

DT2239B DIGITAL STROBOSCOPE

Features:

- Non-contact RPM/vibratility measurement, no sticker needed;
- Wide measurement range;
- Compact size and portable, easy to carry and operate;
- Battery operated, low power consumption;
- Large LCD display with backlight, easy to read;
- Digital control of flash frequency;
- Powerful LED flash lights.

Technical Data:

Measurement range: 60 - 19999 FPM

Coarse/Fine adjust step value:
<1000 FPM

Coarse adjust: +/-10 FPM

Fine adjust: +/-0.1 FPM

>1000 FPM or equal

Coarse adjust: +/-100 FPM

Fine adjust: +/-1 FPM

Accuracy: +/-0.05%

Resolution: 0.1 RPM (<1000 FPM)
1 RPM (>1000 FPM)

Standard accessories:

- 1) Carrying case
- 2) Batteries
- 3) Operation manual

6 powerful LED generate the flash light with low power consumption

Applications:

For RPM/vibratility measurement of non-stop moving/rotating objects, where to use sticker or contact measurement is impossible.
